

TO EXCLUDE OR CONFIRM THE POSSIBILITY OF ALCOHOL INTOXICATION

“MEASURING BLOOD ALCOHOL LEVEL IS AS EASY AS MEASURING GLUCOSE”

-  **Fast blood alcohol measuring device**
-  **Accurate reading up to 500mg/dl,**
-  **Cost effective**
-  **Portable, light, fast and reliable.**
-  **Easy calibration**
(no need for costly service or maintenance)
-  **Easy to use**
-  **Saves money, time and lives**

“IT IS SIMPLE, LIGHT AND EASY TO USE”

Albio-product is paramedics and ER's tool to get accurate information for making live saving decisions in treatments and medications. Naturally, through fast treatment and right decisions by professionals, patients will gain the greatest value from Albio.

Alcohol is the most used drug in the world. More than 45 % of the paramedics' and ER's patients has been drinking. Alcohol is also a big factor in treatment methods and medications. Yet, so far, the only reliable way to get information about the blood-alcohol level have been clinical lab tests. Unfortunately, clinical lab test takes time, is expensive and requires special instrument and skilled staff.

Albio gives reliable result in 25 seconds. It is at least 10 times less expensive, and doesn't require any special skills nor expensive clinical lab instruments.
